Option 1. Log in from Settings

1. Click **Settings** on the left. **2.** Open **Listings & Services**.
Scroll down the right side of the page to **Facebook Marketplace**. Already see a Login required window? Go to page 3.

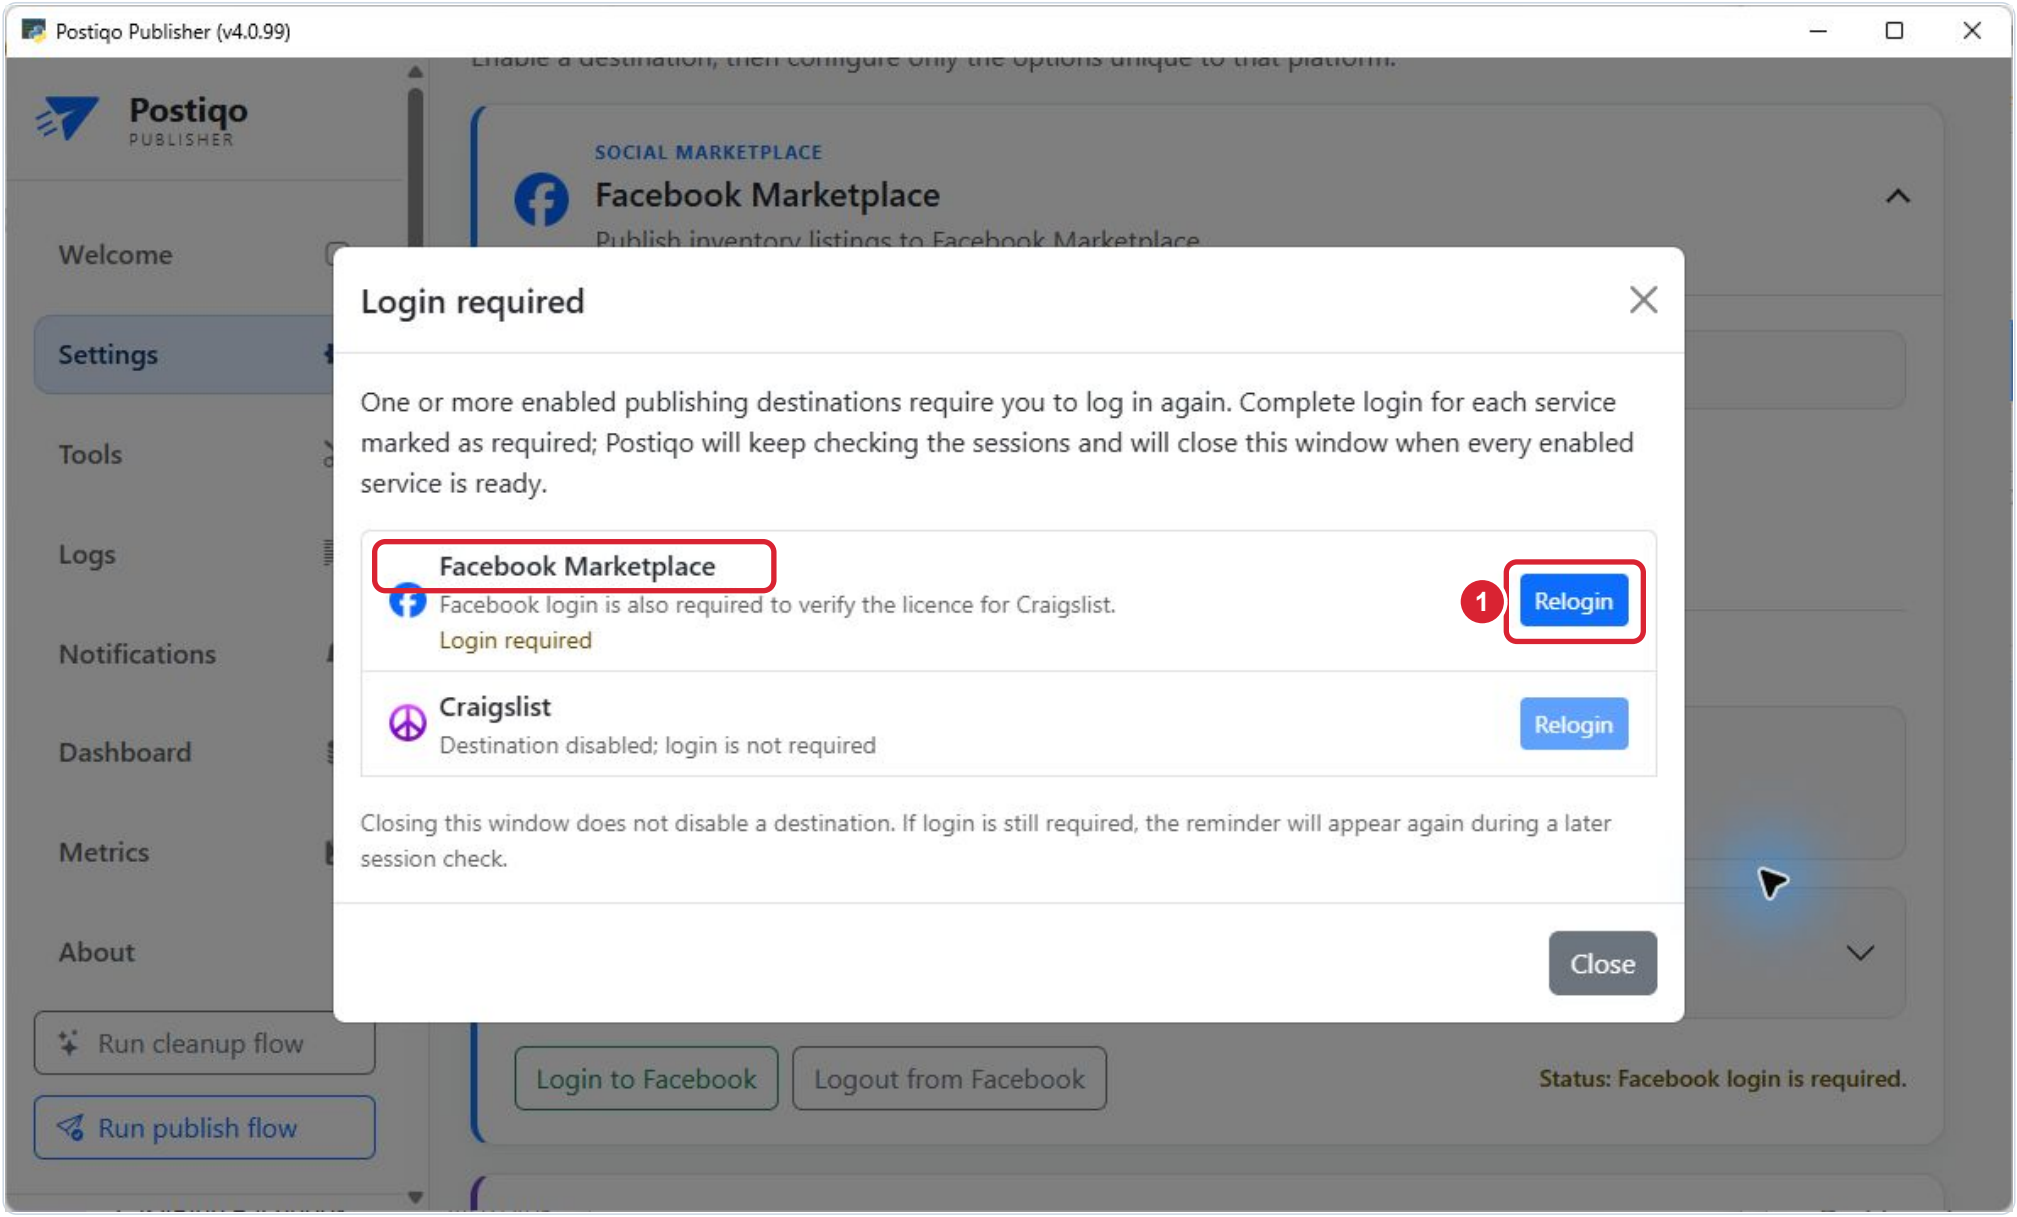

Expand Facebook and click Login

3. Find **Facebook Marketplace**. Click its heading or the arrow on the right if the section is closed.
4. Click **Login to Facebook** at the bottom of this section. Scroll a little further down if you cannot see the button.
Already expanded, as shown below? Click Login to Facebook. Then continue on page 4.

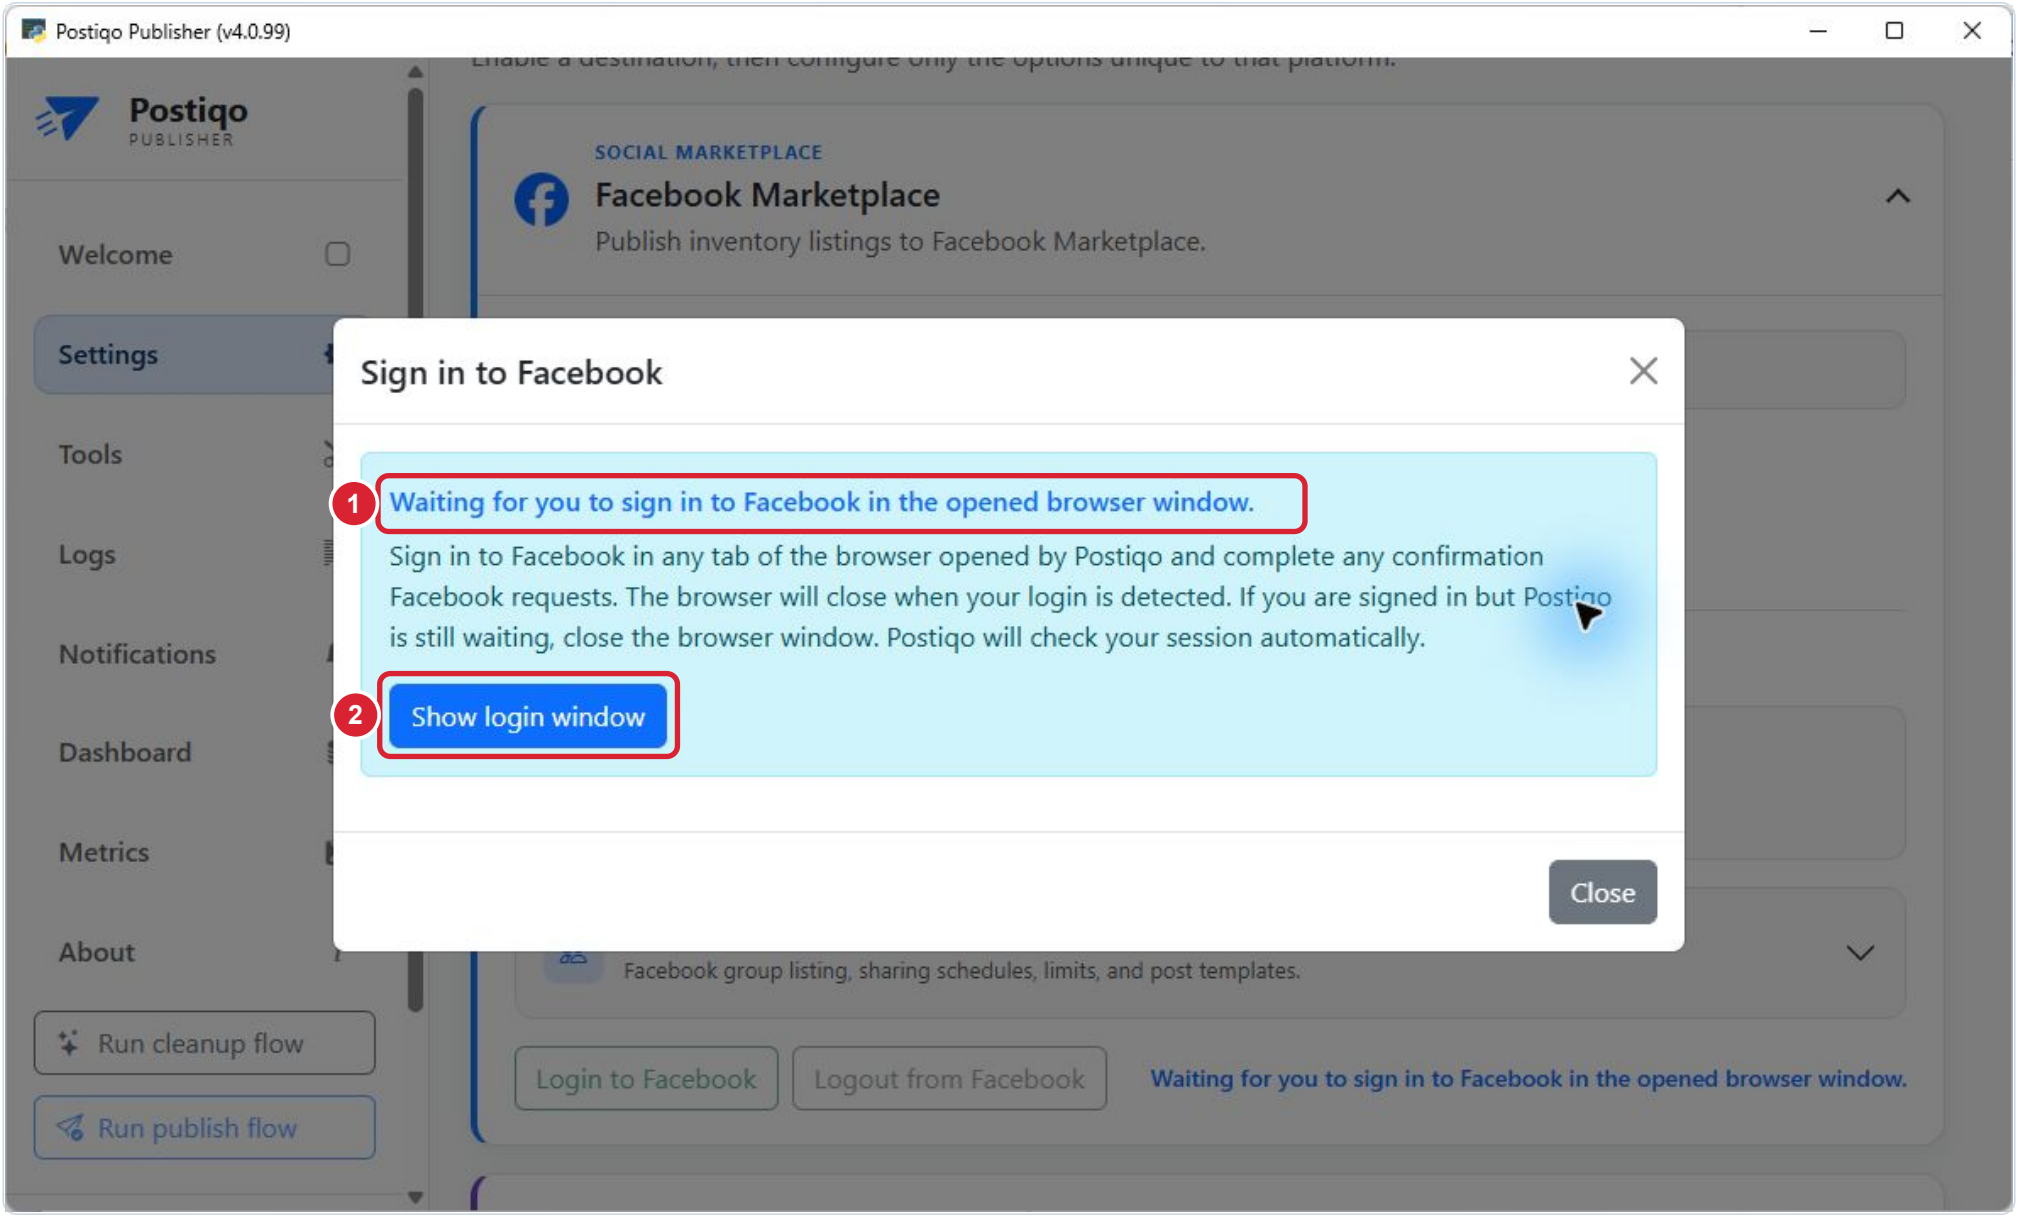

Option 2. Sign in again with Relogin

Click the blue **Relogin** button in the **Facebook Marketplace** row.
The remaining steps are the same for both options. Follow pages 4-8.

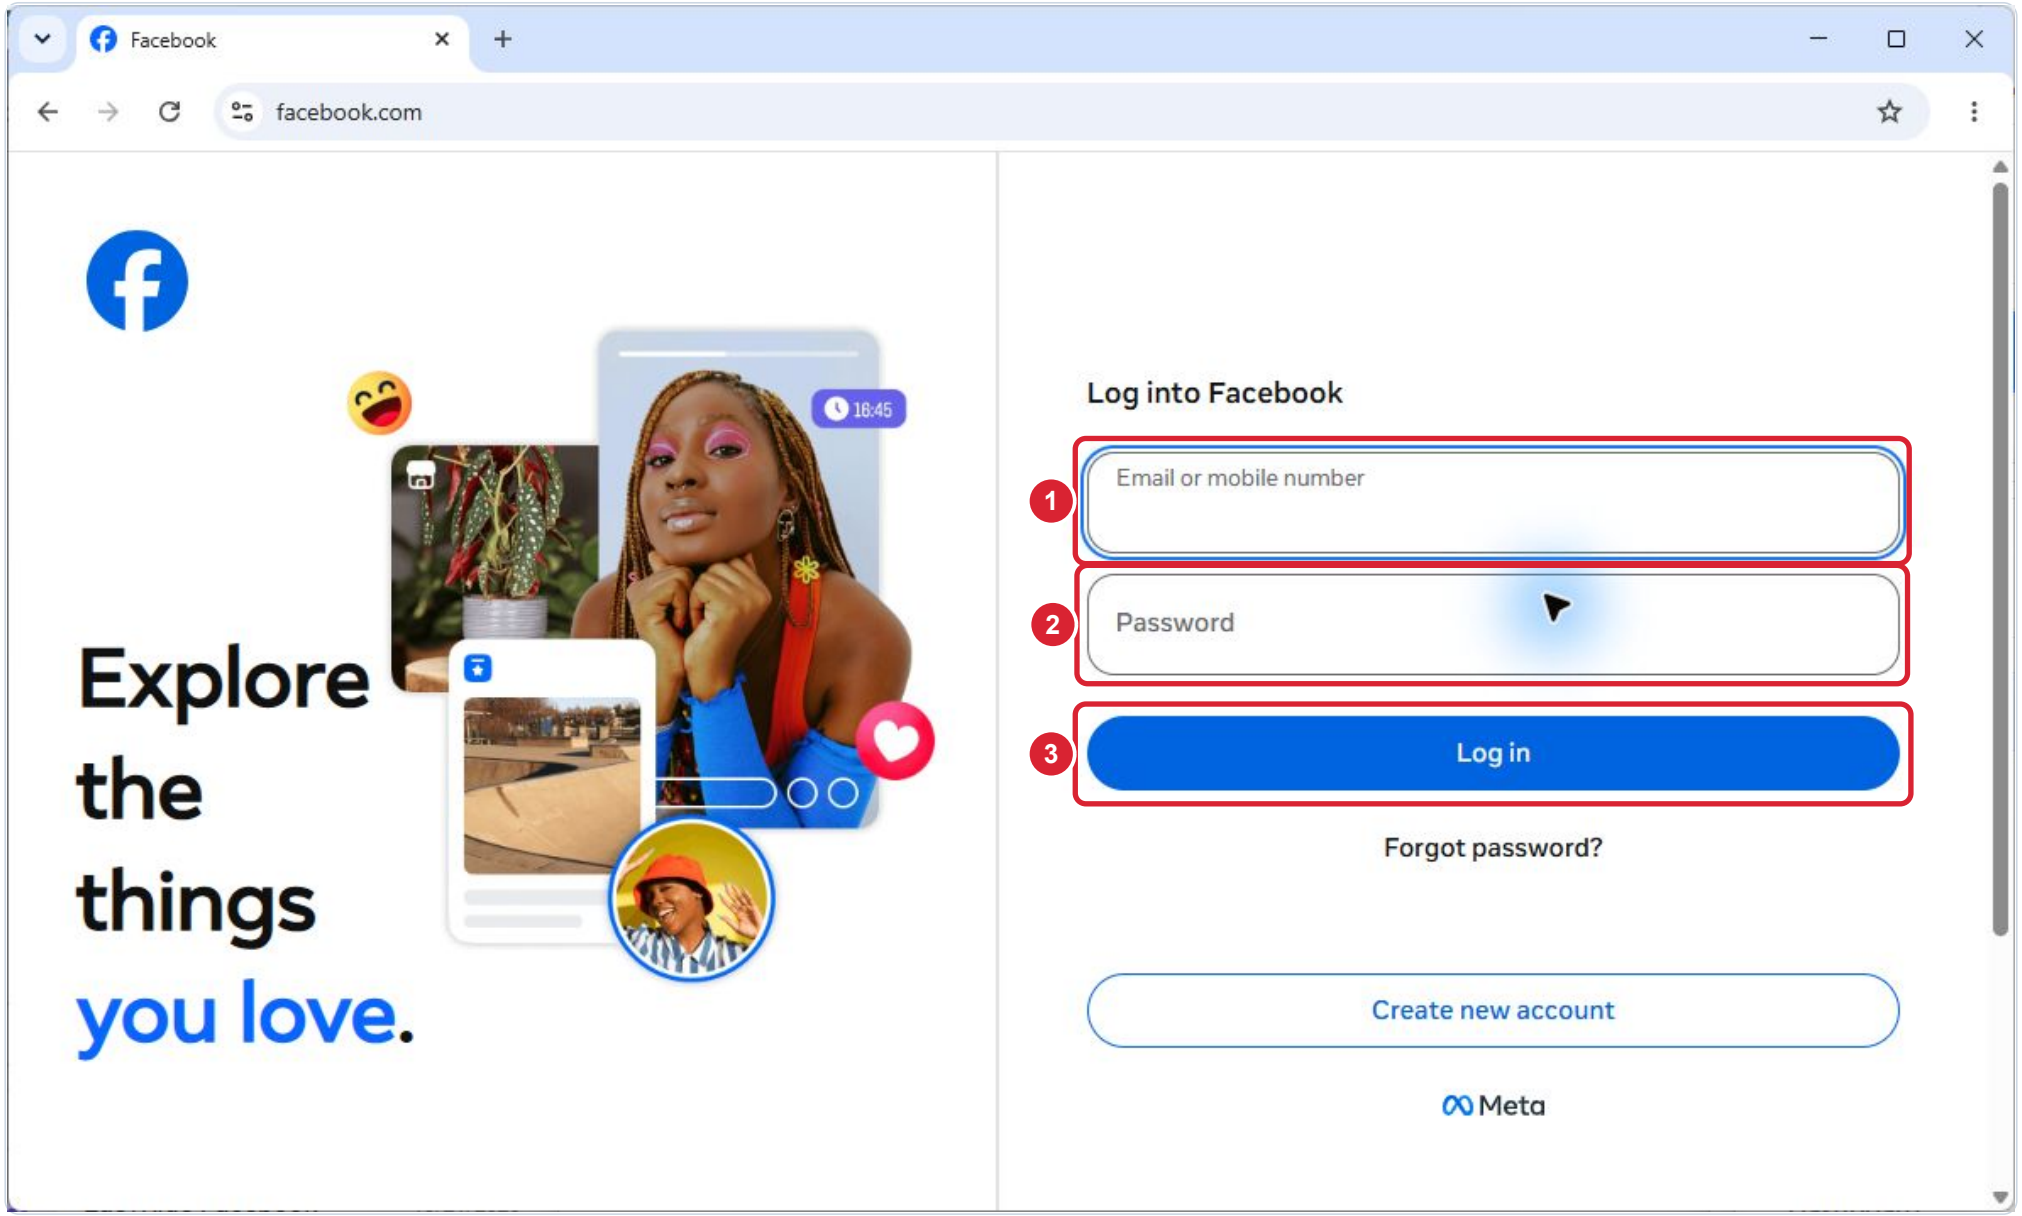

Postiqo opens a browser for you

1. This message means Postiqo is waiting for you to sign in to Facebook.
Sign in using the separate browser window opened by **Postiqo**.
2. Cannot see the browser? Click **Show login window**.

Sign in to your Facebook account

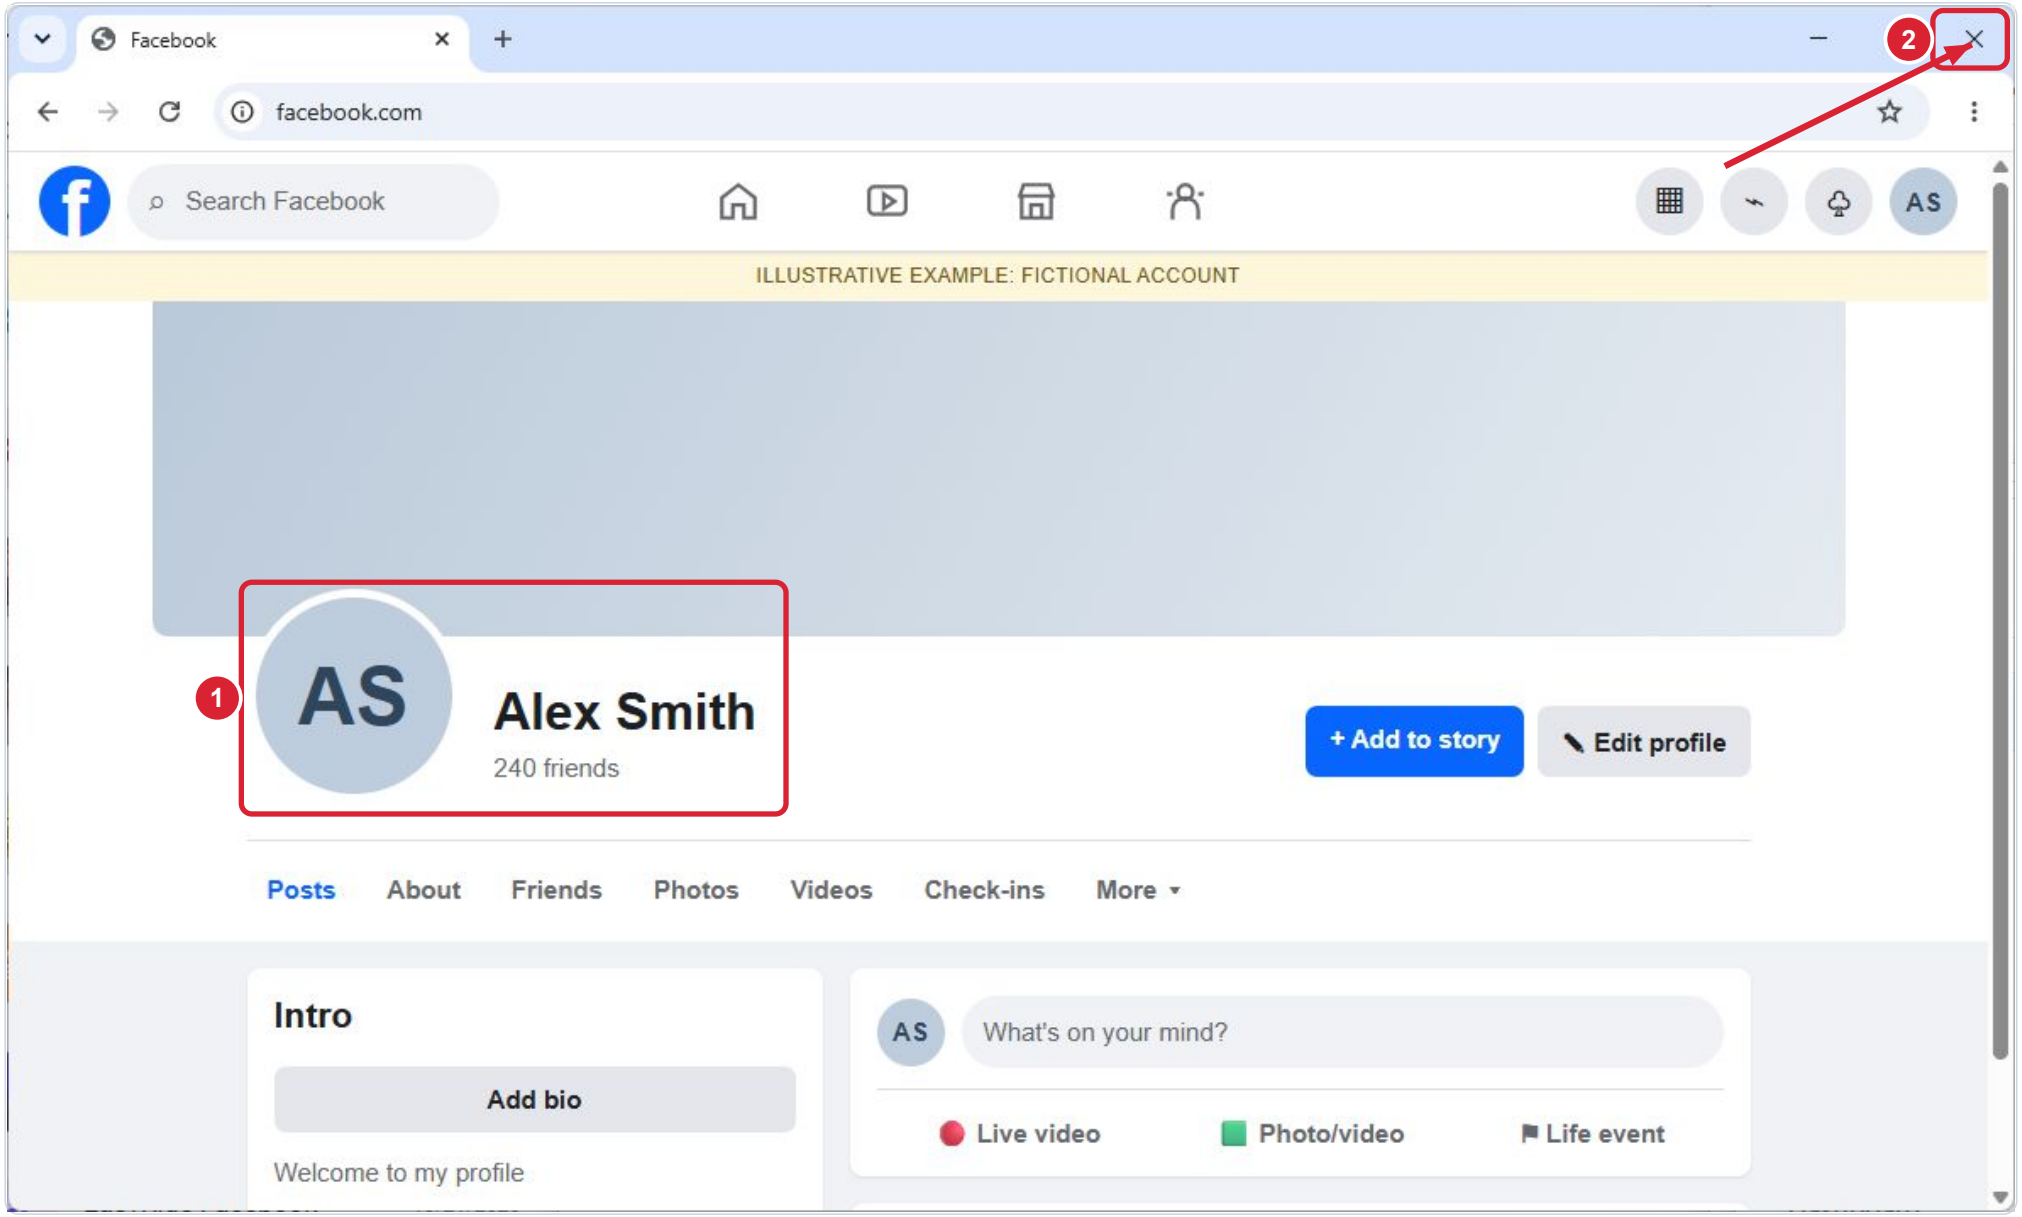

1. Enter your email or phone number. **2.** Enter your password. **3.** Click **Log in**.
If Facebook asks for an SMS code, a code from your app, or confirmation on your phone, complete that step.
Continue until you see your feed or profile. Your Facebook screen may look slightly different.

Actual facebook.com login screen, October 28, 2026. Language and layout may vary.

Your Facebook is open. Finish signing in

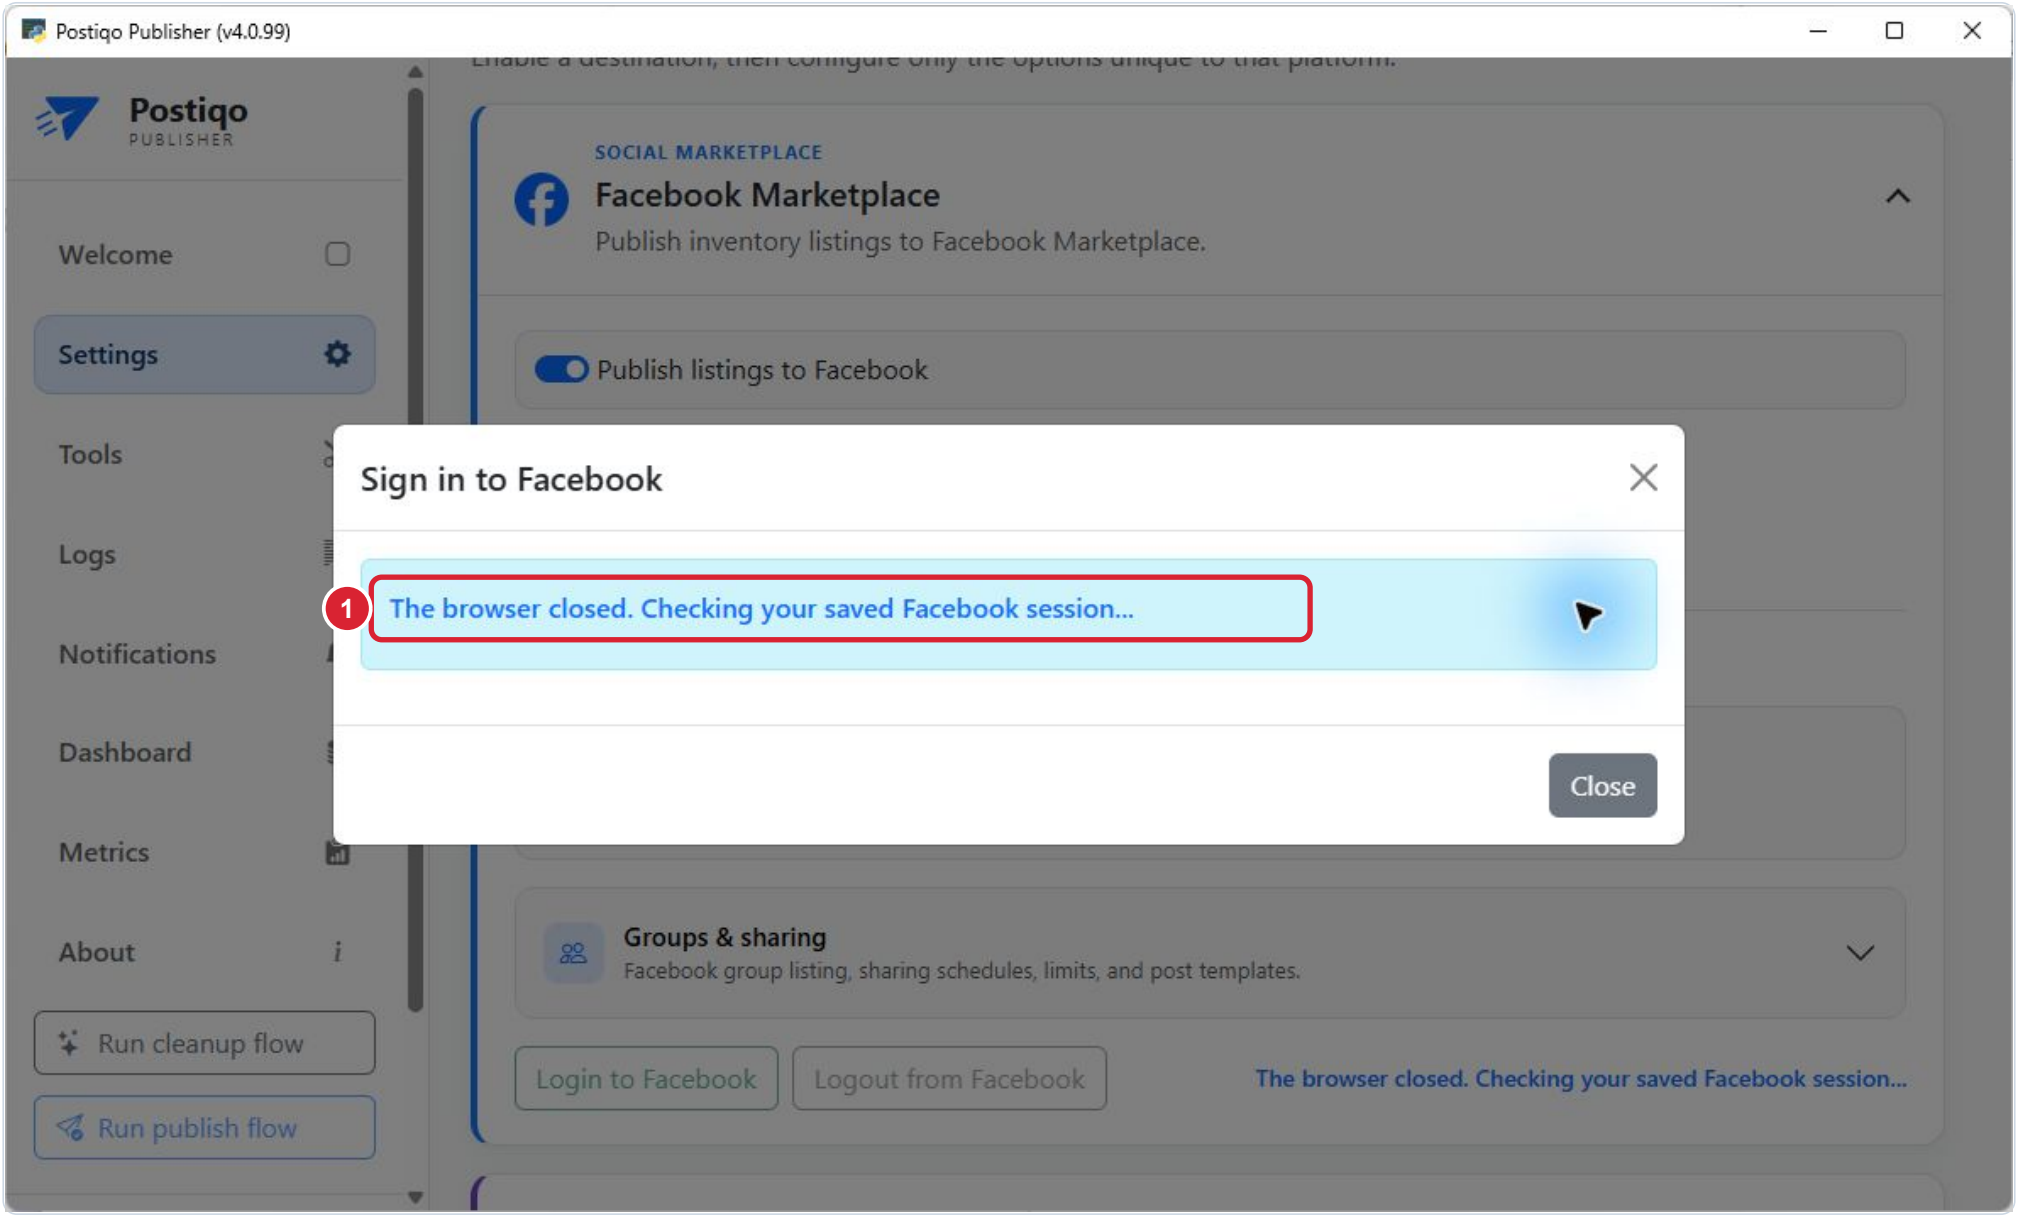

1. Check that this is **your** account. The browser should close automatically.
2. If you are signed in but Postiqo is still waiting, close the browser yourself: click **X at the top right of the whole window**.
Keep Postiqo open and wait for it to confirm your login.

Illustrative Facebook example with a fictional name and profile. The browser close button is real.

Closed the browser yourself? Please wait

Postiqo automatically checks whether your Facebook login worked. You will see the message outlined in red.
You do not need to click anything here. Leave Postiqo open and wait for the result.
This is still a check. The next page shows what a successful login looks like.

Postiqo Publisher v4.0.99. Actual application interface with login states reproduced in a test session.

Done: confirm your login in Postiqo

1. The green **Status: Logged in to Facebook** line confirms you are signed in. It stays visible in Settings.
2. After Relogin, you also see **Success: Facebook relogin successfully finished.** This notification disappears shortly.
If there is no green login status, try signing in again and complete every check Facebook requests.
